

July 2007: Silver Spurs – Celebrating Our 25th Anniversary

SPUR

5th July was an auspicious occasion in the history of Spur – because it was the day that we celebrated our 25th Anniversary in business.

Spur can trace their roots back to the creation of Spur Electron Limited (SEL), which was founded in 1982, offering consultancy services to the international space industry.

The success of Spur Electron – which has now become a world leader in the space and aerospace, industries, with accreditation by NASA and ESA - led to the creation of an IT division, [Spur Information Solutions](#), which was formed in 1993 to provide further impetus for growth.

So the 5th of July was chosen to gather staff, friends, customers, and suppliers to Havant for a site visit and demonstrations, followed by a celebratory luncheon.

“Developing Spur has been a very rewarding, if occasionally challenging experience”, says Spur’s founder and managing director Malcolm Snowdon. “The 25 years has flown by, and the good news is that the two businesses have never been in better shape – and nor have they faced the future with so much potential for future growth. But of course none of this would have been possible without the support of our team, our customers, our suppliers – not to mention our families and friends. That’s why the celebration day was so important to us – because it’s good to be able to say thank you personally.”
